PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years of hands-on experience in AWS and GCP environments, specializing in Kubernetes deployments, CI/CD automation, and containerization. Experienced in managing multi-cloud infrastructure, monitoring production systems, and ensuring reliable and scalable cloud deployments.

EXPERIENCE

Associate DevOps Engineer | IHX Private Limited [July 2024 – Present]

- Managed **CI/CD pipelines** using **Jenkins**, **Git**, and **GitLab CI** for automated build and deployment workflows across Kubernetes-based applications.
- Containerized applications using **Docker** and deployed them on **Amazon EKS** and **Google Kubernetes Engine (GKE)** clusters, implementing **Kubernetes Readiness Probes** to improve deployment stability and traffic routing.
- Supported **ISO**, **SOC 2**, and external compliance audits by performing periodic user access reviews, validating **Role-Based Access Control (RBAC)** across **Jenkins**, **AWS IAM**, **Grafana**, **MongoDB**, and **MinIO**, removing inactive accounts, and preparing infrastructure documentation for audit readiness.
- Configured centralized logging and monitoring using **Grafana**, **Loki**, and Promtail, while performing quarterly and half-yearly production alert reviews to improve observability and reduce alert fatigue.
- Implemented scheduled **Jenkins** automation jobs to delete stale records from specific MongoDB collections, reducing manual database maintenance.
- Configured **SonarQube Quality Gate** validation at the **GitHub Pull Request** level, ensuring code vulnerabilities and quality issues were resolved before merging into higher branches.
- Developed an automated **Amazon RDS** utilization monitoring solution that generated structured **Excel** reports containing query, user, pod, and application-level details and delivered **Slack** alerts for proactive troubleshooting.
- Configured **Kubernetes Horizontal Pod Autoscaler (HPA)** using **CPU**, **Memory**, **Pub/Sub message backlog**, and **Application Active Connection** metrics to optimize application scalability and resource utilization.
- Enhanced the **Jenkins** onboarding pipeline by integrating **AWS Secrets Manager**, enabling secure handling of application credentials and eliminating hardcoded secrets from deployment YAML files.
- Created a **Jenkins** onboarding pipeline to automate **Amazon ECR** repository creation, generate **Kubernetes Secret YAML** files, update deployment YAML configurations with secret references, and support bulk onboarding of application secrets.
- Executed migration of multiple applications and related database workloads from **Google Cloud Platform (GCP)** to **AWS**, updating Kubernetes deployments, cloud configurations, and standardizing application health check endpoints to ensure a seamless production transition.
- Configured **Kubernetes Ingress** resources and cloud load balancers with **host-based** and **path-based routing**, **BackendConfig tuning**, and **Server-Sent Events (SSE)** timeout optimization.
- Troubleshot production **Kubernetes** issues including **CrashLoopBackOff**, **OOMKilled**, **FailedScheduling**, **ImagePullBackOff**, ingress routing, and networking issues across **Amazon EKS** and **Google Kubernetes Engine (GKE)** environments.
- Configured **Google Cloud Pub/Sub** topics, subscriptions, **IAM** permissions, and event-driven **microservices**, resolving publisher/subscriber permission issues and message backlog handling.
- Provided **L2/L3 Production Support** by investigating infrastructure incidents, analyzing application logs, coordinating with development teams, managing **MinIO** bucket access policies, and implementing permanent fixes across **AWS** and **GCP** environments.

Cloud Associate Intern | Easy Deploy

April 2024 - June 2024

- Worked with AWS services including **CodeDeploy**, **Lambda**, **ECR**, **ECS**, **API Gateway**, **RDS**, and **RDS Proxy** to support cloud-based application deployments.
- Developed automated **ECS** task scheduling using AWS **Lambda** to start and stop **ECS** tasks based on defined schedules, optimizing resource utilization.
- Built a **CI/CD** pipeline for a **ReactJS** application using **GitHub Actions** to automate testing, building, and deployment workflows.
- Contributed to **pipeline** enhancements and deployment **automation** tasks to streamline development and release processes.
- Assisted in configuring **cloud services** and troubleshooting **deployment** issues across development environments.

TECHNICAL SKILLS

Cloud Platforms - AWS, Google Cloud Platform (GCP)
Containerization & **Orchestration -** Docker, Kubernetes (Amazon EKS, Google Kubernetes Engine (GKE))
CI/CD & Version Control - Jenkins, Git, GitHub, SonarQube, GitLab CI
Monitoring & Logging - Grafana, Loki, Promtail
Databases - MongoDB, Amazon RDS
Security & Access Management - AWS IAM, AWS Secrets Manager

CERTIFICATES

- **Google Cloud Certified – Professional Cloud Architect (GCP)**
- **Google Cloud Certified – Associate Cloud Engineer (GCP)**
- Certified as a **Cloud Associate Intern** – Easy Deploy, Coimbatore
- Certified in **DevOps** – Besant Technologies, Bangalore
- Certified in **AWS** – Besant Technologies, Bangalore
- Certified in **Linux** – Besant Technologies, Bangalore
- Internship Program in Web Development with Raspberry Pi – COITOR IT TECH, Coimbatore

---

ACADEMIC PROJECTS

AI-Driven Self-Healing Infrastructure Monitoring and Failure Analysis System

- Developed an AI-driven self-healing infrastructure monitoring system using **Python, Flask, Docker, Elasticsearch, Filebeat, Ollama (Llama 3.2),** and **Kibana.**
- Implemented automated log collection, AI-powered root cause analysis, and intelligent recovery execution with post-recovery verification.
- Designed a decision engine to detect infrastructure failures, perform predefined recovery actions, and validate recovery success automatically.
- Built interactive Kibana dashboards for centralized log monitoring, failure analysis, and recovery status visualization.

ACADEMICS

- **Master of Computer Applications (MCA)** – Computer Science with IT, Jain University (Expected Oct 2026)**.**
- **B.Sc. Computer Technology** – Dr. N.G.P Arts and Science College (2023)
- Completed Higher Secondary (HSC) – Prema Matric Hr. Sec. School – 2020.
- Completed Secondary School (SSLC) – Prema Matric Hr. Sec. School – 2018.
